DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I claims 1-29 in the reply filed on November 09, 2006 is acknowledged.

This application is in condition for allowance except for the presence of claims 30-32 directed to an invention non-elected without traverse. Accordingly, claims 30-32 been cancelled.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

In the *specification* beginning at **line 4**, please make the following amendment:

This application is a continuation-in-part of U.S. application Serial No. 09/124,540 now US Patent 6,792,430 filed July 29, 1998, which is hereby incorporated by reference in its entirety.

The claims have been amended as follows:

Cancel claims 30-32

4. The following is an examiner's statement of reasons for allowance:

In the Office Action mailed March 31, 2006 claims 26-29 were noted as allowed. Applicant's amendment to independent claims 1 and 21 overcomes the rejection cited under 35 USC 112 second paragraph. The prior art of record fails to teach the structure of linking digital information objects in a digital information space through creation of an overlay as cited in independent claims 1, 21 and 26. Also, regarding independent claim 1, the following limitation is not taught in the prior art as claimed: "display at least one user-selectable link associated with each keyword common to both the displayed contents of the accessed digital information object and to a concept described by the keyword, the user-selectable link providing access to another digital information object in the digital information space". Regarding independent claim 21, the following limitation is not taught: "displaying a user selectable link for each keyword phrase found in the scanned contents, each user-selectable link providing access to at least one related digital information object, wherein the information node representing each of the at least one related digital information object is associated with at least one concept node including at least one keyword phrase found in the scanned contents". Regarding independent claim 26, the prior art of record fails to teach "exporting the at least one concept node from the overlay for use in at least one other overlay".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
